## “Understanding Protective Glazing in Architectural Design”

Speakers: **Brianna Nastasi** – Director of Architectural Products and  
**Chad Snyder** – Director of Security Products at McGrory Glass

5:30 Social Hour

6:30 Dinner / *Scholarship Presentations* / Program

Dinner cost \$60 members/\$80 non-members

Foster Golf Links/Billy Baroo's

13500 Interurban Avenue South

Tukwila, WA 98168

**RSVP Deadline: Friday, June 6<sup>th</sup>** Cancellations Accepted through Deadline Date - WGA Bills for No Shows

A key part of designing safe and secure facilities is choosing the right mix of protective, structural, and decorative glass to meet safety and security requirements while improving the health and welfare of building occupants. This course offers an analysis of the latest innovations and trends in security and fire-rated glazing and demonstrates how each can be used in architectural design. Attendees will learn about the various types of performance glazing, required building codes, test standards, and how to select life safety products based on application.

### Key Takeaways:

- The differences between safety and security glass.
- How fire-resistive and security glazing can help ensure safe corridors and evacuation routes, as well as intrusion prevention.
- The “need to knows” of different testing and certification methods for bullet, ballistic, and fire-rated protective glazing.
- Incorporating decorative elements to promote the health and welfare of building occupants via daylighting features, privacy capabilities and wayfinding.
- Navigating clients’ safety concerns and balancing with design requirements.
