Innovations in Vacuum Insulated Glass

Speaker: **Jennifer Bryant** – *Director of Sales at LuxWall*

5:30 Social Hour / Table Talks

6:30 Dinner / Program

Foster Golf Links/Billy Baroo's

13500 Interurban Avenue South

Tukwila, WA 98168

Dinner cost \$60 members/\$80 non-members

RSVP Deadline: Thursday, Sept.30th ~ Cancellations Accepted until Deadline Date - WGA Bills for No Shows

What if windows could insulate like a wall?

We're at a pivotal moment in the building industry. Energy codes along with carbon reduction goals are front and center, and occupants expect more from the spaces they live and work in. As demand for high-performance building material grows, recent innovations in Vacuum Insulated Glass, or VIG, have the potential to transform the role of glazing in the built environment. In this presentation, we'll explore what makes VIG different from standard IGUs, the innovations driving it forward, and how it's being applied in real-world projects. Let's talk about: What exactly is VIG? The latest Innovations in VIG. Real-world applications and case studies. Why VIG is critical for energy-efficient building envelopes?
